Description

Testware and work products

CommentsComment by [Ciocan Pál András](#) [21/May/26]*Testware* is created as **output work products** based on test activities and tasks.

- **test planning work products:**
 - test plan, test schedule, risk register, entry criteria, exit criteria
 - risk register is a list of risks together with risk likelihood, risk impact and information about risk mitigation
 - test schedule, risk register, entry criteria and exit criteria are often a part of the test plan
- **test monitoring and test control work products:**
 - test progress reports, documentation of control directives and information about risks
- **test analysis work products:**
 - prioritized test conditions(e.g. acceptance criteria) and defect reports regarding defects in the test basis
- **test design work products:**
 - prioritized test cases, test charters, coverage items, test data requirements and test environment requirements
- **test implementation work products:**
 - test procedures, manual and automated test scripts, test suites, test data, test execution schedule and test environment items(latter include: stubs, drivers, simulators, service virtualizations)
- **test execution work products:**
 - test logs and defect reports
- **test completion work products:**
 - test completion report, action items for improvement of subsequent projects or iterations, documented lessons learned, change requests(product backlog items)
